

Ahmed Khaled AbdAllah

Front End Developer (React.js/Next.js)

Portfolio: <https://ahmedkhalid.com>

GitHub: <https://github.com/Ahmd-Khaled>

LinkedIn: <https://www.linkedin.com/in/ahmed-khaled-4b313526a>

Address: New Bani-Suif, Bani-Suif, Egypt

SUMMARY

Frontend Developer with extensive experience in React.js, Next.js, and Tailwind CSS. Skilled in building modern, responsive web applications and dashboards with a strong focus on performance, accessibility, and clean code. Passionate about delivering fast, user-friendly experiences across all devices using the latest front-end technologies.

EDUCATION

Alexandria University — Bachelor of Engineering in Communications and Electronics, May 2011.

TECHNICAL SKILLS

- **Languages & Markup:** HTML5, CSS3, SASS, JavaScript, TypeScript
- **Frontend Frameworks & Libraries:** React.js, Next.js, Redux Toolkit, React Hook Form (RHF), SWR, TanStack Query, Formik, i18next
- **Styling & UI:** Tailwind CSS, Bootstrap, Material UI
- **Backend & APIs:** Node.js, Express.js
- **Database:** MongoDB
- **DevOps & Tools:** Docker, Git, GitHub
- **Tools & Platforms:** Vercel, VPS, Shared Hosting, Cron Jobs
- **Design & Collaboration:** Figma, Zeplin

PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer

HATRIX – Saudi Arabia (Remote, Part-Time)

April 2024 - Present

- Developed responsive and user-friendly interfaces using React.js, Next.js, and Tailwind CSS.
- Collaborated remotely with cross-functional teams to deliver scalable web solutions.
- Focused on performance, accessibility, and clean UI implementation.

Key Projects:

1. PlanB Portfolio Website

Tech Stack: Next.js 15, Tailwind CSS • **Deployment:** Node.js Server

<https://planbq.com>

- Designed and implemented a responsive single-page portfolio website showcasing personal and professional content.

2. Shobyk Portfolio Website

Tech Stack: Next.js 15, Tailwind CSS • **Deployment:** Node.js Server

<https://shobyk.com>

- Created a modern, single-page portfolio website focused on visual presentation and performance.

3. Used Brand Portfolio Website

Tech Stack: Next.js 15, Tailwind CSS • **Deployment:** Node.js Server

<https://usedbrand-qa.com>

- Developed a single-page portfolio website to highlight brand services and identity.

4. Onyxen Portfolio Website

Tech Stack: Next.js 15, Tailwind CSS • **Deployment:** Node.js Server

<https://onyxen-regalia.com>

- Designed and built a sleek portfolio site tailored to a luxury brand aesthetic.

5. Gold Era Trading Website *(In Progress)*

Tech Stack: Next.js 15 • **Deployment:** Vercel

<https://goldera-website.vercel.app>

- Designing and developing a gold trading platform optimized for user-friendly navigation and real-time updates.

6. Gold Era Management System

Tech Stack: Next.js 14, Cron Jobs • **Deployment:** VPS Server

[Dashboard \(Vercel\)](#) | [Live \(VPS\)](#)

- Full-featured management platform with multi-role access (Admin/User) for gold trading companies.
- Features: product and store management, stock control, transactions, local/global order processing, coupons, scheduling, analytics, content management, user roles, and more.

7. Gold Era Platform

Tech Stack: React.js • **Deployment:** Vercel

<https://golderaplatform.vercel.app>

- Designed a comprehensive customer registration system with authentication and validation mechanisms.

8. Yumgott Dashboard

Tech Stack: React.js • **Deployment:** Vercel

<https://yumgott-dashboard2.vercel.app>

- Developed a food rating and review dashboard with intuitive UI and dynamic data filtering.

9. Seha – Sick Leave Inquiry System

Tech Stack: Next.js 14 • **Deployment:** Shared Hosting

<https://sehi.ws>

- Built a medical leave inquiry and registration system for doctors and companions to submit and track leave status.

10. Khotwa – Medical Inquiry Platform

Tech Stack: Next.js 14, TanStack Query v5, next-intl, Formik • **Deployment:** VPS Server

<https://www.khotwa-map.com>

- Developed a multi-language medical leave inquiry and registration platform for healthcare professionals.

11. Hatrix Portfolio Website

Tech Stack: React.js • **Deployment:** Shared Hosting

<https://www.hatrix-technology.com>

- Designed and developed a single-page company portfolio website to showcase services and brand identity.

Mid-Level Frontend Developer

MBN Group – Saudi Arabia *(Remote, Part-Time)*

08/2023 – 08/2024 (1 Year)

- Collaborated closely with the Team Leader, Backend Developers, and UI/UX Designers to deliver high-quality, scalable websites.

- Led and mentored a junior Frontend Developer, providing guidance on best practices, code structure, and project workflows.
- Developed responsive web applications using **React.js** and **Next.js**, ensuring cross-platform compatibility for desktop and mobile devices.
- Implemented **Redux Toolkit** for efficient and scalable state management across complex UI components.
- Integrated frontend with backend services using **RESTful APIs**, ensuring seamless data flow and robust performance.
- Applied **SEO best practices** using tools such as next/head in Next.js and react-helmet in React.js to improve search engine visibility.
- Enabled **internationalization (i18n)** using libraries like i18next, allowing multi-language support across the platform.
- Wrote clean, modular, and maintainable code following industry standards and modern JavaScript/TypeScript conventions.
- Optimized application performance for speed and scalability through code-splitting, lazy loading, and efficient rendering techniques.
- Translated Figma and design wireframes into high-quality, pixel-perfect UI components.

Key Projects:

1. D2020 – Business Directory Platform

Tech Stack: Next.js 14, Redux Toolkit, i18next, Formik

<https://d2020web.vercel.app/>

- Rebuilt the existing d2020.net website using Next.js, replacing the legacy pure JavaScript codebase.
- Designed the platform to function similarly to **haraj.com.sa**, targeting business listings in the Arabian Gulf.
- Developed a scalable database to help business owners increase visibility in search engines and reach new customers.

2. Nestretto E-Commerce Platform

Tech Stack: React.js, Redux Toolkit, i18next, Formik

[Website Preview](#) | [Official Site](#) (Not yet live)

- Designed and developed a full-featured e-commerce site with 16 dynamic pages integrated with backend APIs.
- Implemented features:
 - Global category-based search
 - Product filtering by category
 - Cart and wishlist management
 - Promotion code application
 - Full checkout and payment flow integration
 - Order history tracking with real-time status updates
 - Secured routing with role-based access protection for sensitive pages (cart, checkout, account)

3. D2020 Contracts Admin Dashboard

Tech Stack: React.js, Redux Toolkit, i18next, Formik

<https://d2020-contracts-dashboard.vercel.app> (Contact for credentials)

- Designed and implemented a responsive admin dashboard (desktop layout) to manage all contract delegate operations.
- Utilized **TanStack Table v8** for complex data grids with advanced search, filters, and sorting functionality.

4. Serih Azoz Restaurant – QR Menu Website

Tech Stack: Next.js 14

<https://serih-menu.net>

- Built a mobile-first, single-page QR code-based digital menu for a restaurant, optimized for customer access via smartphones.

5. EasyElevator Portfolio Website

Tech Stack: React.js

<https://www.easyelevator.net>

- Designed a company portfolio website for a construction and elevator services business.

6. Mahercp Job Request Form (2 Versions)

- **v1 – jQuery Version:**
 - https://mahercp.net/job_request.html
 - Updated legacy job application form UI and functionality.
- **v2 – Next.js Version:**
 - <https://mbn2.vercel.app/job-request>
 - Rebuilt the job request form in a modern React-based architecture with Next.js 14.

7. Kayan Egypt Portfolio Website

Tech Stack: React.js

<https://kayan-egypt.vercel.app>

- Developed a single-page portfolio website for a KSA-based construction company, focused on mobile responsiveness and clean design.

8. Mahercp Company Portfolio

Tech Stack: React.js

<https://mbn2-bice.vercel.app>

- Contributed to the design and development of the official company portfolio website.

Frontend Developer

Freelancer (*Remote, Part-Time*)

01/2022 – Present

- Developed responsive, interactive websites using **React.js**, and more recently **Next.js**, following best practices for performance and maintainability.
- Built clean, semantic front-end code using **HTML**, **CSS**, and **JavaScript**, ensuring seamless cross-device compatibility for desktop and mobile users.
- Delivered tailored web solutions for diverse clients, focusing on user experience, scalability, and code quality.

Key Projects:

Nesco – E-commerce Website

Live: <https://nescoreact.vercel.app/>

GitHub: (*private or not available*)

Tech Stack: HTML, SASS, React.js, Redux Toolkit, i18next, Formik

- Developed a complete online shopping experience with multilingual support, form validation, and global state management using Redux Toolkit.

Salla – E-commerce Website Clone

Live: <https://salla-lilac.vercel.app/>

GitHub: <https://github.com/Ahmd-Khaled/salla>

Tech Stack: HTML, SASS, Next.js, Redux Toolkit

- Cloned the core features of the Salla platform with modern front-end technologies and Redux-based state management.

HomeService – Portfolio Website

Live: <https://homeservice1-nu.vercel.app/>

GitHub: <https://github.com/Ahmd-Khaled/homeservice>

Tech Stack: HTML, SASS, Next.js

- Created a landing website for a home services business with responsive design and clean UI layout.

Spotify Clone – Music Player Website

Live: <https://spotify-kappa-snowy.vercel.app/>

GitHub: <https://github.com/Ahmd-Khaled/spotify>

Tech Stack: HTML, CSS, Next.js, Redux Toolkit, RapidAPI

- Built a music streaming web app with real-time API integration for track data and playback features.

Twitter Clone – Social Media Website

Live: <https://twitter-v4-8v43wf8ys-ahmd-khaled.vercel.app/>

GitHub: <https://github.com/Ahmd-Khaled/twitter-v4>

Tech Stack: HTML, CSS, Next.js

- Developed a simplified version of Twitter featuring timeline layout and responsive design.

Kibsons Admin Dashboard – E-commerce Dashboard

Live: <https://kibsonsadmin.vercel.app/>

Tech Stack: HTML, CSS, React.js, SASS, Material UI

- Designed a desktop-friendly admin dashboard for product and order management with React components and custom styling.

Kibsons – E-commerce Website

Live: <https://kibsons-three.vercel.app/>

Tech Stack: HTML, CSS, React.js, Redux Toolkit

- Developed major sections of an online store, including product listings and cart functionality with Redux state management.

MetroMarket – E-commerce Website

Live: <https://metro-seven.vercel.app/>

GitHub: <https://github.com/Ahmd-Khaled/metromarket>

Tech Stack: HTML, CSS, React.js, JSON Server

- Built a fully functional e-commerce prototype using a local JSON server for backend simulation.

Portfolio Website

Live: <https://ahmedkhalid.com/>

- Personal website showcasing all major projects, technical skills, and contact information.

SOFT SKILLS

- Team Collaboration
- Problem Solving
- Communication
- Time Management
- Adaptability
- Attention to Detail

CERTIFICATIONS

- Advanced Next.js – Index Academy
- Node.js Professional Course – Route Academy

Network Field Experience
